PROFESSIONAL PROFILE

Software Engineer with experience building and optimizing growth systems. Skilled at collaborating with marketing and design teams to ship experiments, track performance, and iterate based on data. Combining frontend engineering expertise with hands-on experience in conversion optimization, analytics instrumentation, and paid acquisition.

Technical Skills:

- **Frontend Development** – JavaScript, TypeScript, React
- **Marketing & Analytics Tools** – Google Analytics, Google Tag Manager, Google Ads, Sentry
- **AWS Tools** – SNS, SQS, SES, ECS, EC2, S3
- **Data Management** – SQL, PostgreSQL, MongoDB
- **CI/CD Pipelines** – Jenkins, CircleCI
- **Testing** – React Testing Library, Jest, JUnit
- **Backend Development** – Java, Spring Boot

WORK EXPERIENCE

THE GROWING GUIDE

2025 – Present

Founder, Lead Engineer

Built and launched a web app using React/TypeScript and LLM integrations on AWS, owning the full product lifecycle from UX/UI design and user testing to checkout flow and digital fulfillment via dynamic PDF generation.

- Optimized growth funnel through Google Ads campaign management and analytics instrumentation (GA, GTM), reducing cost per signup 35% (from \$3.19 to \$2.07) and achieving 34% visitor-to-signup conversion across 300+ users.

APRIORI TECHNOLOGIES, Concord, MA

2021 – 2024

Software Engineer

Developed company's flagship product, a React/TypeScript application with Spring Boot microservices housed in AWS, as part of Scrum team for manufacturing clients. Contributed to Agile transformation that shifted release cadence from yearly to every two weeks, serving as proof of concept for faster delivery across the organization.

- Designed a proof of concept (POC) for new search-system behavior, gaining support from management, product, and UX, leading to a revamped system that reduced expensive backend API requests and improved user experience.
- Extended localization framework to support sustainability program, implementing compound unit conversions with datum standardization for consistent backend processing and user-preferred display units.
- Led quarterly Big Room Planning for distributed scrum team, presenting technical plans to non-technical leadership and coordinating across 5+ backend teams. Implemented new estimation methodology that reduced project timeline inflation from 100%+ to below 15%.
- Contributed to shared React component library and built data visualization features using Recharts, used across 4 teams and 3 products to improve UI consistency and enable engineers to track design iteration metrics.

OPEN DOOR EDUCATION, Concord, MA

2018 – 2023

Senior Tutor and Software Developer

Provided one-on-one tutoring in high school mathematics and SAT preparation.

EDUCATION

Bachelor of Arts, English, Journalism and Professional Writing, UNIVERSITY OF MASSACHUSETTS, Lowell, MA

Bachelor of Arts, Mathematics, UNIVERSITY OF MASSACHUSETTS, Lowell, MA
